OBJECTIVE

Innovative Full-Stack Developer skilled in web, software, and AI engineering, focused on crafting scalable digital experiences and automation tools.

EXPERIENCE

Computer Information System Expert III

CIS Department, Mount San Antonio College, Walnut, CA (August 2023 – Present)

- Provide individual and group tutoring for 75 web programming students, improving assignment completion rate by 55%.
- Support curriculum support for HTML, CSS, JavaScript, Node.js, Python, and PHP, enhancing conceptual understanding by 40%.
- Leverage tools like VS code, Git, GitHub, node.js, Deno, flask, Django, markdown, Canva, CodePen, Ubuntu Server, and SQL, contributing to a 20% increase in student project success.
- Monitor attendance, report student participation, and communicate progress with instructors, improving student retention by 35%.

Web Developer & Full Stack Developer

Bimmer Plug, Irvine, CA (December 2024 – April 2025)

- Develop custom Shopify themes using Liquid, optimize performance, and integrate third-party apps for enhanced functionality.
- Optimize Shopify SEO and implement CRO strategies, improving organic rankings, user engagement, and conversion rates by 35%.
- Perform quality control and backend optimizations, resolving UI/UX issues, checkout errors, and integrating APIs to enhance store performance.
- Diagnosed and resolved issues related to website functionality and compatibility across multiple browsers and devices

Web Development and AI Automation Intern

HypeFactor.AI, San Francisco, CA (May 2024 – June 2024)

- Collaborated with the development team to design, develop, and test an AI-powered marketing platform, reducing deployment time.
- Applied prompt engineering techniques to train language models for automating various aspects of ad campaign creation, analysis, and optimization, increasing efficiency by 35%.
- Designed visually engaging and responsive front-end components using HTML, CSS, JavaScript, and React, enhancing platform engagement.
- Assisted in backend development, debugging, and ensured quality assurance, leveraging PHP, Typescript, MySQL, and other backend frameworks and services to help optimize and facilitate the functionality and capabilities of the platform by 33%.

EDUCATION

Bachelor of Science Degree, Business Administration, Computer Information Systems

California Polytechnic University, Pomona, Pomona, CA (June 2025)

Associate of Science Degree, Computer Programming

Mount San Antonio College, Walnut, CA (June 2023)

PROJECTS

AI Career Assistant Platform — React.js, Node.js, Express.js, MongoDB, GPT-4, Tailwind CSS, Chart.js, AWS

Designed and deployed an AI-powered platform that analyzes resumes, generates tailored cover letters, and evaluates job-to-resume match scores with ATS simulation.

- Integrated GPT-4 for resume analysis, keyword match scoring, and AI-generated content
- Enabled PDF report downloads, job description parsing, and email notifications for feedback
- Built with React (frontend), Node.js/Express (backend), and MongoDB (database)
- JWT/Firebase-ready auth system and CI/CD pipelines using GitHub Actions
- GitHub: github.com/mzkhan626/ai-career-assistant.git

AI-Powered E-Commerce Platform — React.js, Node.js, Express.js, GPT-4o, Tailwind CSS, MongoDB, AWS, Docker

Created a full-stack e-commerce platform with GPT-powered product discovery, personalized recommendations, and admin management tools.

- Implemented GPT-4o natural language search and collaborative/content-based recommendations
- Developed Wishlist system, review summarizer, sliding cart, and Stripe mock checkout
- Built a responsive UI with Tailwind CSS, dark mode, and performance optimizations
- Included role-based admin dashboard with product, user, and order management
- CI/CD automation via GitHub Actions.
- GitHub: github.com/mzkhan626/AI-Powered-E-Commerce-Platform

SKILLS

Client-Side: HTML, CSS, JavaScript, TypeScript, React, Angular, Bootstrap, Tailwind CSS, SASS, UI/UX Design, Shopify Liquid, Kotlin

Server-Side: Node.js, Python, PHP, Java, C++, Express.js, Django, MongoDB, MySQL, MariaDB, Oracle, Firebase, ShopifyAPI, REST APIs

AI & Automation: GPT (OpenAI API), Prompt Engineering, Machine Learning (Regression, Decision Trees, K-means), Deep Learning

(TensorFlow, Keras), NLP (Sentiment Analysis, Topic Modeling), AI-Powered Resume Builder, AI Marketing Tools

Big Data & Cloud Platforms: AWS (S3, EC2, Lambda, Redshift, DynamoDB, Athena), Apache Spark, Hadoop, ETL Pipelines, Data Warehousing, Kafka Streaming, Tableau, Power BI

Tools & Platforms: Git, GitHub, VS Code, Android Studio, XAMPP, Docker, Ubuntu Server, Oracle VM, Postman, WordPress, Adobe Creative Suite, Canva, GIS (ArcPro, ArcPy)
